

Computer Graphics Web Page Design

The Evolution of Design

At Graphic Park we specialize in Custom Designed Web Pages,
[Print Layout](#) and Design for Books, Brochures et.
And [ebook layout](#) for Kindle & Smashwords and more..
See [Services](#)

Web Pages can be very complex in design while still being easy to navigate.

Rather than try to list the many options for each web design,
(Gif's, Animated Gif's, JPEG, 3-D Rendering, Java Script, Audio, etc.) we have come
to realize that it is easier for both parties to simply consult with our staff and we will
give you a reasonable quote.

If the quote is accepted then you just sit back and watch the progress, with your
input throughout the process. most sites are finished and up-and running within about
10 days. Depending on the size of course.

Prices to clients have ranged from \$400 to \$5,500.
Average pricing is \$800 to \$1,500

All prices include: listings with the major search engines.
We work very hard to get you a high listing without resorting to spamming, which can
lead to your site being banned from some search engines.

Unlimited Photo's and corresponding thumbnail shots, no charge for links, no
hidden charges for maintenance, billed as needed.
This is your Web Site, you decide if you would like an update. If however your page
requires daily, weekly or monthly changes, we can work out an affordable way to
accommodate your needs.

Mobile freindly sites are available with custom graphics. Fitting all devices from
home PC's to tablets and Smartphones.
